Sanku Naga Surya Teja Spandan

User Experience Designer | Product Designer

Visakhapatnam | +91 92916 65104 | suryasanku800@gmail.com | Portfolio: sankusurya.github.io/Surya_UIUX

UI/UX Designer with hands-on experience designing web and mobile products, backed by 1.5 years of design and engineering work in telecom. Currently designing EduProva, an AI-powered education and career super-app, from requirements to developer-ready screens. Skilled in user research, information architecture, user flows, wireframing, high-fidelity UI, interactive prototyping, and design systems in Figma. Uses vibe coding and the Figma MCP server to turn designs into working prototypes faster. Works closely with product and development teams to deliver clear, consistent, and easy-to-use experiences.

SKILLS

- **Design Tools:** Figma, Photoshop, Illustrator, Canva, LottieFiles for Figma
- **UX Skills:** User Research, Competitor Analysis, Information Architecture, User Flows, Wireframes, Prototypes, Usability Testing
- **UI Skills:** Responsive Design, Design Systems, Accessibility, Interaction Design, Visual Design Principles
- **Figma:** Auto Layout, Components, Variants, Interactive Prototypes, Dev Mode Handoff, Figma MCP Server
- **AI & Vibe Coding:** Vibe Coding (AI-assisted prototyping and front-end builds), AI-assisted design-to-code workflows
- **Methods & Frameworks:** Design Thinking, User-Centered Design, Iterative Design
- **Front-end Basics:** HTML, CSS
- **Collaboration:** Stakeholder Collaboration, Design Reviews, Developer Handoff

PROFESSIONAL EXPERIENCE

Dilshaj Infotech, Visakhapatnam, India | *UI/UX Designer* **Nov 2025 – Present**

- Handled end-to-end UI/UX design for EduProva, an AI-powered education and career super-app that brings learning, jobs, freelancing, and community into one platform.
- Turned product requirements into competitor analysis, information architecture, user flows, wireframes, and high-fidelity screens.
- Designed connected modules for online learning, AI resume builder, AI interview assistant, job portal with AI auto-apply, freelancing marketplace, social and messaging, payments, and certificates.
- Built reusable Figma components and a design system with auto layout and variants to keep the look and feel consistent across the platform.
- Created interactive prototypes and improved the AI job board and auto-apply flows based on usability feedback.
- Worked with developers and product stakeholders to deliver developer-ready designs and specs through Dev Mode handoff.
- Used the Figma MCP server with AI coding tools and vibe coding to turn Figma screens into working front-end prototypes, speeding up design-to-code handoff.

Key Achievements:

- Designed 6 major product areas of one platform (learning, AI tools, jobs, freelancing, community, and supporting flows) with a single, consistent visual language.
- Created a reusable component library to keep the UI consistent across all modules and make developer handoff easier.

Cyient, Visakhapatnam, India | *Design Specialist – Telecom Network Engineering* **Oct 2023 – Apr 2025**

- Created detailed technical drawings and network layouts in AutoCAD, with true-to-scale dimensions and POP calculations.
- Led 12+ digitization projects, turning scanned coax and fiber network records into clear, accurate digital designs on the GRB land base.
- Followed strict drawing standards for layers, symbols, and labels, building a strong eye for detail, consistency, and visual clarity.
- Used MARLIN (ArcMap), Smallworld, TINA, GAMA, LARA, and GeoTev to design and update network maps.
- Reviewed and quality-checked every drawing before delivery so teams could read and use it without errors.

Key Achievements:

- Recognized by Project Manager for consistent high-quality work delivery.

KEY PROJECTS

Fuel N Fix | *UI/UX Designer*

- Designed a roadside assistance app concept to help drivers discover nearby fuel stations and vehicle repair services when support is needed on the road.
- Worked on problem framing, case-study structure, interface hierarchy, and visual design to make nearby assistance easier to understand and access.
- Focused on clearer service identification and helping users distinguish fuel support from vehicle repair options.

AI Job Board | *UI/UX Designer*

- Designed an AI-enabled job discovery and application experience focused on reducing friction throughout the job search process.
- Worked on job cards, job details, recruiter-side drafts and confirmation screens, and the AI auto-apply flow.
- Explored resume-based job matching, screening-question support, personalized cover letters, application tracking, and status updates.
- Iterated on the auto-apply experience based on usability-testing feedback.

EduProva — AI Tech Skill Super-App | *UI/UX Designer*

- Designed and refined a multi-module education and career product spanning online courses, live and recorded learning, AI tools, job discovery, freelancing, community interactions, messaging, certificates, and support experiences.
- Contributed user flows, wireframes, high-fidelity screens, responsive layouts, reusable Figma components, and interactive prototypes.
- Worked across job-board flows, freelancing, onboarding, live learning, and AI interview assistance.

EDUCATION

Andhra University, Visakhapatnam | *Bachelor of Science (MECS)* **2020 – 2023**

CERTIFICATIONS

- **Certificate in UI-UX Development** – Tech Mahindra SMART Academy, Visakhapatnam (Apr – Aug 2025)
- **User Experience Designer (Grade A)** – Skill India / NSDC, Tech Mahindra Foundation (2025)
- **LottieFiles for Figma Course** – LottieFiles (2026)

ACHIEVEMENTS

- Cleared the NSDC User Experience Designer assessment with Grade A, Tech Mahindra Foundation, 2025
- Recognized by Project Manager for consistent high-quality work delivery, Cyient
